ALPHA TESTING REPORT

Dream Home Property Management Web Application

Report basis: Issues and observations recorded in the handwritten alpha-testing checklist provided by the project team. This report organizes those observations into test areas and issue records. Individual test execution evidence, browser/device details, tester names, dates, and retest outcomes were not supplied; these are left for the team to complete.

1. Testing Overview

Field	Details
Testing phase	Alpha Testing
Application	Dream Home Property Management Web Application
Testing scope	Public website, property search/listings, enquiry and visit booking, contact/FAQ/blog, customer dashboard, admin dashboard, agent management, forms and email-related flows
Environment / build	Not provided
Testing date	Not provided
Tester(s)	Not provided
Overall assessment	Issues were noted across UI, navigation, responsive layout, forms, popups, dashboards and data-related workflows. Fixes and retesting are recommended before wider release.

2. Summary of Findings

The handwritten checklist records multiple defects or suspected defects. Since pass/fail evidence and retest results were not included, the counts below should be treated as a triage list—not as verified execution statistics.

• **Website UI / navigation / responsive layout:** Property navbar CSS; login icon; registration validation; property-search city/location behavior; Meet Our Agent icon hover; instant enquiry side layout; WhatsApp/call floating controls; latest blog close icon; CTA schedule-visit content alignment; FAQ should close on outside click; footer phone/email links; property-page hamburger; mobile featured properties/projects; mobile instant-enquiry layout; blog hamburger; contact map embed; ongoing projects CTA.

• **Booking / enquiry / property data:** Schedule-on-enquiry popup/call issue; popup not found; Book Property flow not working; customer saved-property details popup; new projects not appearing on home page; admin add-property five-image issue; admin dashboard card counts/statuses; total leads/properties/available/rented/booking cards; ongoing project details.

• **Customer dashboard:** Sidebar color; saved-property details should open on click; back-to-dashboard CSS; active/inactive sidebar; Explore Property link.

• **Admin dashboard / agent management:** Toast issue; reply-to-customer popup does not close after error; form validation; activate/deactivate agent issue; agent-management View popup not working when clicked outside; dashboard navigation/exit behavior; password toggle.

• **Contact / email:** Footer phone and email should open the appropriate call/email action when clicked; email-related issue; contact map should use an embedded Google Maps link.

3. Detailed Defect / Test Observation Register

Statuses are marked “Open — to verify” because the notes do not state whether a fix has already been applied or independently retested. Priorities are suggested for triage and should be confirmed by the project team.

ID	Feature / test area	Observation from checklist	Priority
UI-01	Property navbar styling / login icon	Navbar CSS or login icon appears incorrect.	Medium
AUTH-01	Registration form validation	Registration-page validation needs checking/fixing.	High
PROP-01	Property search by city/location	Search should return properties for the entered city/location; behavior reported as problematic.	High
ENQ-01	Schedule visit / enquiry popup	Schedule-visit-on-enquiry popup/call issue; popup reportedly not found.	High
UI-02	Meet Our Agent icon hover	Icon hover color should be white; observed behavior needs correction.	Low
ENQ-02	Instant enquiry side layout	Instant-enquiry side panel/layout differs from expected, particularly on mobile.	Medium
UI-03	WhatsApp / Call floating controls	Floating WhatsApp or call controls need verification.	Medium
BLOG-01	Latest Blog close icon	Blog close/cross icon should be white.	Low
CTA-01	Schedule Visit CTA content alignment	Schedule-visit CTA content should be centered/aligned correctly.	Medium
FAQ-01	FAQ closes on outside click	Clicking outside an open FAQ should close its dropdown.	Low
FOOT-01	Footer phone/email links	Phone number and email should open the appropriate call/email action when clicked.	Medium
RESP-01	Property-page hamburger menu	Hamburger menu reportedly not working on property page.	High
RESP-02	Mobile featured properties/projects	Featured property and project sections are not displaying correctly on mobile.	High
RESP-03	Mobile instant-enquiry layout	Instant-enquiry layout on mobile should match the intended layout.	Medium
RESP-04	Blog-page hamburger menu	Hamburger menu reportedly not working on blog page.	High
CONTACT-01	Contact map embed	Add/use an embedded Google Maps link in the contact map area.	Medium
BOOK-01	Book Property workflow	Book Property function reportedly not working.	Critical
CUST-01	Saved property details popup	Clicking a saved property should open its details popup.	High
CUST-02	Customer dashboard navigation/styles	Sidebar color, Back to Dashboard CSS, active/inactive sidebar states and Explore Property link need checking.	Medium
ADMIN-01	Dashboard card counts/statuses	Verify total leads, total properties, available/rented properties, bookings and total agents/today's schedule counts; notes indicate card/status issues.	High
ADMIN-02	Add Property image upload	Admin Add Property flow reportedly has an issue with five images.	High
PROJ-01	New project on Home Page	A newly added project is not appearing on the Home Page.	High
ADMIN-03	Admin dashboard toast	Toast notification issue reported.	Medium
ADMIN-04	Reply-to-customer error popup	Popup does not close after an error; error handling and close behavior need fixing.	Medium
EMAIL-01	Email functionality	Email-related issue reported; exact failure and reproduction steps not supplied.	High
FORM-01	Admin dashboard form validation	Form validation issue reported.	High

ID	Feature / test area	Observation from checklist	Priority
AGENT-01	Activate/deactivate agent	Agent activation/deactivation workflow reportedly has an issue.	Critical
AGENT-02	Agent Management View popup	View popup does not behave/close as expected when clicking outside.	Medium
ADMIN-05	Dashboard exit/navigation behavior	Notes say the dashboard is exiting/leaving unexpectedly; exact steps need confirmation.	High
AUTH-02	Password visibility toggle	Password show/hide toggle needs verification.	Low
PROJ-02	Ongoing Projects / Talk to Our Expert CTA	Verify ongoing-project section and Talk to Our Expert CTA phone action.	Medium

4. Recommended Retesting Checklist

• Verify property search using multiple valid city/location inputs and no-result input.

• Test registration and admin forms for required fields, invalid formats, duplicate values and clear error messages.

• Open and close schedule-visit, enquiry, saved-property and agent-view popups; test close button, outside click and error states.

• Test Book Property and email/reply-to-customer workflows end to end.

• Verify admin property creation with five images and confirm newly created projects appear on the Home Page.

• Cross-check dashboard counts against database records and confirm available/rented/booking statuses.

• Test agent activation/deactivation, login access for inactive agents, and expected session behavior.

• Check responsive behavior at mobile, tablet and desktop widths, including property and blog hamburger menus.

• Verify FAQ outside-click close, footer tel:/mailto: links, WhatsApp/call controls, map embed and password visibility toggle.

• Record evidence, browser/device, steps to reproduce, expected vs actual result, owner, fix version and retest result for each issue.

5. Exit Criteria / Sign-off

Recommended release gate: resolve all Critical and High priority issues, retest the affected workflows, confirm no regression in login, property listing/search, booking/enquiry, admin CRUD and agent access, and attach screenshots/logs for any remaining accepted defects.

Role	Name / signature	Date
QA / Tester	_____	_____
Project Owner	_____	_____

Note: This report is drafted from the supplied handwritten alpha-testing notes. It does not claim that fixes have been completed or that every issue has been reproduced. Update status and attach test evidence after execution and retesting.
